What is this product?

TYPE OF PRODUCT

The product is a sub-fund of FWU Protection Fund SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg. The Fund is subject to Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment (UCITS), as amended or supplemented from time to time.

TERM

The Fund is incorporated for an unlimited period. It may be dissolved at any time with or without cause by a resolution of the general meeting of shareholders adopted in compliance with applicable laws.

OBJECTIVES

Objective: The Sub-Fund seeks to maximise long-term capital growth by investing primarily in fixed income securities issued by corporate and government entities that are mainly domiciled in major developed markets across the world, while at the same time only investing in lower risk securities within this universe. However, the fund will target to have a low risk profile when measured on volatility and maximum drawdowns.

Portfolio securities: The Sub-Fund aims to achieve its investment objective through direct investments in fixed income securities traded on Regulated Markets or on markets that are regulated, operate regularly and are recognised and open to the public. In addition, the Sub-Fund can invest into eligible ETFs based on fixed income securities within global developed and emerging markets. As the portfolio seeks out to be low risk in nature, at least 90% of the net assets of the Sub-Fund (excluding cash) should consist of Investment Grade securities (rated BBB- or above by Standard & Poor's or Fitch or Baa3 or above by Moody's). There will be no investment by the Sub-Fund in securities below Investment Grade or non-rated securities. The portfolio will target an average rating of A- or above and an average duration of 3 years or below. The Sub-Fund will target a long-term volatility of less than 3% p.a. The Sub-Fund may also invest in forward currency contracts, Exchange traded Futures and in plain vanilla option strategies (such as selling or buying of call options or put options) either as a hedge or for efficient portfolio management. The Sub-Fund will have recourse to securities lending for the purposes of efficient portfolio management up to a maximum of 50% of the Net Asset Value of the Sub-Fund. Under normal circumstances, it is generally expected that the principal amount of such transactions will not exceed 30% of the Net Asset Value and remain within the range of 5% to 30% of the Net Asset Value.

Investment process: The management company invests primarily in fixed income securities of companies and governments that are mainly domiciled in major developed markets across the world, based on quantitative and fundamental analyses. The portfolio is managed with a structurally high degree of diversification in mind. Designed for: Investors who understand the risks of this Sub-Fund and who plan to invest their money for the long term. Base currency: EUR.

INTENDED RETAIL INVESTORS

The CI-EUR Share Class is reserved for Institutional Investors.

The Sub-Fund is intended for investors seeking long-term capital growth. The Sub-Fund is intended as a long-term investment. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the Sub-Fund.

What are the risks and what could I get in return?

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

In accordance with legislation, we have classified this product as 2, which is a low risk class. Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.

The summary risk indicator only reflects historical share price volatility for the Sub-Fund or its proxy.

Exposure to foreign currencies, derivatives and the ability of the Sub-Fund to buy back its own shares may increase risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 10 000. The scenarios shown are illustrations using the worst, average, and best performance of the product.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or its proxy over the last 5 years. The scenarios shown are illustrations based on results from the past and certain assumptions. The stress scenario shows what may occur in extreme market circumstances.

What happens if FWU Invest is unable to pay out?

The investors of this product will not face financial loss due to the default of the FWU Protection Fund SICAV, as the Sub-fund is considered to be a separate entity with segregated assets.

What are the costs?

The annual cost impact shows what impact the total costs you pay, will have on the investment return you might get. The total costs take into account one off, ongoing, and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods and in each case based on the moderate scenario set out in the performance scenarios. The figures assume you invest EUR 10 000. The figures are estimates and may change in the future.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 74	EUR 362
Annual cost impact (*)	0.7%	0.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.1 % before costs and -0.8 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide for you.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year		
One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment.	EUR 0
Exit costs	The impact of the costs of exiting your investment.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments.	EUR 41
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product.	EUR 33
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0

This illustrates the effect of costs over a holding period of at least one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

How long should I hold it and can I take my money out early?

Recommended holding period: 5 years.

Each Business Day is a Valuation Day. The Cut-Off Time for subscription and redemption applications is 1:00 pm CET on the Valuation Day.
